AT ACADEMY OF ART UNIVERSITY

Student work by Eric Seaburg

Become Masterful

Using a brush, pen, pencil, or stylus—on paper, canvas, or a computer screen—you'll learn about line, form, perspective, atmosphere, composition, research, and rendering. These skills are taught by our unequalled faculty of professional illustrators.

An Extraordinary Portfolio

Most importantly, you will graduate not only with a substantial personal portfolio that will illustrate your extraordinary skills, but also with the business and marketing savvy required to succeed in your career.

Student work by Annie Nguyen

Inspire the world.

Gain the skills and business savvy to inspire the world through your imagination. At the School of Illustration, you will master traditional and digital drawing and painting skills, while learning to promote yourself to cultivate a successful illustration career.

We believe in staying on the leading edge of industry trends and have benefited from partnerships with key technological leaders such as Adobe and Apple.

Curriculum

Our curriculum is designed to develop your ability to visually communicate concepts and tell stories at a professional level. You will learn realistic rendering and stylistic characterization skills that will prepare you to work in a variety of industry disciplines, including children's picture books, comics/graphic novels, magazine or ezine editorial, art licensing, and advertising.

Through rigorous studio courses, we teach the fundamental principles of visual storytelling and what you need to create a competitive, industry-ready portfolio.

Student work by Iris Lin

OF

Selected Areas You Will Explore:

Digital Media

Nothing is evolving faster for artists than the world of digital technology. To be competitive, you will learn how to use all the current digital tools to create both vector and bitmap illustrations that can be used in print, apps, Web publishing, and comics.

Graphic Novels/Comic Books

Create and sell your own stories as a comics artist. Layout artists draw pages for comics, inkers create line art for comics, colorists and lettering artists fill them in, and writers provide the story framework.

Clothed-Figure Drawing

You will learn how to take your figurative work to new heights using techniques that help convey character, attitude, mood, spirit, and values. You will fine-tune your ideas through design and construction, informed by the history of costume, structure, staging, and color.

Illustration

Illustrators tell our collective stories in pictures. We will teach you the fundamental principles of visual storytelling to enable you to master the art of making your work come to life.
