OF

Define the sound of the creative economy.

We offer three degree tracks: Music Production, Music Scoring & Composition, and Sound Design.

The creative discipline of music and sound design serves a wide variety of industries: Film and television, 3D animation, gaming, immersive VR/AR, advertising and more. Music and sound are at the heart of creating powerful entertainment experiences for global audiences. The School of Music Production & Sound Design for Visual Media at the Academy of Art University provides cutting-edge training in soundtrack production for entertainment media: sound design, music scoring, and music production training for the contemporary sonic artist. Join us, and learn how to create compelling soundtracks for the entertainment media industry.

Facilities & Tools

- Professional digital recording studios including fully equipped Digital Audio Workstations
