Professional photographers are made here!

The School of Photography is a creative, real-world working environment that expands your technical abilities across a variety of tools and platforms, and prepares you for careers in this vibrant, evolving industry.

Our photography classes will teach you to become a visual storyteller who can create images that command the attention of a number of different audiences, including paying clients and employers. You will graduate with a cohesive body of work that demonstrates your abilities in both traditional and digital formats.

As a Student, You Will Gain:

- Experience in a variety of digital camera formats
- Expert working knowledge of Photoshop
- Expert working knowledge of Lightroom and Capture One
- Advanced compositing and photo illustration techniques
- Experience in motion capture and video editing
- Expert training in studio and on-location lighting
- Traditional training in 35mm, medium, and large format film; and darkroom techniques
- Working knowledge of alternative and historical processes including cyanotypes, Van Dyke Brown, wet plate and more
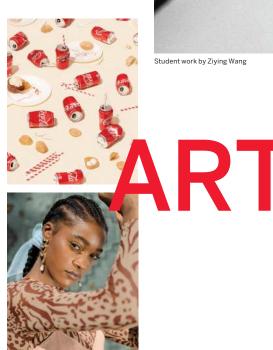

Defy the Ordinary, Create the Extraordinary

Learn from working professionals from both inside and outside the Academy who will mentor you and help you perfect your ability to see with a photographer's eye. Work with students from the School of Fashion to produce and execute photo shoots and collaborate with students from Game Development, Acting, Film & Television, and Animation to create images for film production and video game development.

Our vibrant, collaborative programs mirror the best real-world working environments today. You'll learn to combine your vision, style, and technical proficiency to creatively illustrate compelling ideas and narratives. You'll become a master of photographic storytelling, expanding your technical abilities across a variety of tools and platforms.
